- Science Fair Project – final projects due Jan. 23-25
- Multiplication and Division

Science Fair

I hope things are going well with the Science Fair Projects. Results and Conclusions are due tomorrow. If for some reason you will not be able to complete this by then, please send me a note. We will begin typing final reports and making graphs/charts in class this week. The kids will be doing this mostly on their own. If you have not yet purchased a science fair board, I still have them available for \$4.75. Just send in the money and I'll send home a board. Remember the projects are due to school between Jan. 23 and 25.

Student Teacher: I would like to welcome Mr. Harshman to our classroom. The kids are very excited for him to be here and so am I. We will be doing a lot of co-teaching versus the typical student teaching program that many of you are used to seeing. I will not be leaving the classroom for long stretches of time as other student teaching programs often require. I hope to see great things happening due to this collaborative student teaching model.
